## TECHNICAL SKILLS

## Web Technology

ReactJS, React-Redux, Redux-Saga, jQuery, Node.js, Express, Flask

## HTML, CSS, Material-UI, Bootstrap

## Languages

## JavaScript, Python

## Database

## PostgreSQL

## Tools

Git, JEST, MS Visual Studio Code, Amazon Web Services (AWS), Version One, Visio

## Project Management

PRINCE2 Practitioner

## PROFESSIONAL EXPERIENCE

## Software Development Student

Prime Digital Academy

Minneapolis, USA

April 2019 - present

## Solo Project: Job Application Tracker App

- Created an app to help job seekers easily organize and track their job application progress by centralizing job-related information at one single location
- User is able to enter and delete jobs, update job status and edit details, search for an existing job, upload job related files into AWS S3, fetch new job posts using web scraping, and get reminders for follow up actions
- Technologies: React, Redux, Sagas, Node.js, PostgreSQL, Material UI, AWS S3, Chart.js, Cheerio

## IT Business Analyst

## TCF Equipment Finance

Minneapolis, USA

October 2017 – November 2018

**Responsibility:** Design a new credit auto-scoring system for customer onboarding process

- Elaborated business needs through workshops with system users and conducted gap analysis
- Worked closely with Product Owner and agile development team, represented business needs in backlog discussions and sprint planning meetings, provided story points estimation for functional user stories
- Extracted historical credit application data from data warehouse, performed data transformation and cleansing, and ran preliminary analysis with Model Development team

### Business Process Manager

Allianz Worldwide Partners

Paris, France

July 2016 – February 2017

#### **Responsibility: Design and implement an end to end IT set-up for mobile insurance business line**

- Coordinated with 3 project teams working on connecting 3 existing IT systems to support the new business
- Led discussions with Operations, Sales and Underwriting in order to build functional requirement
- Onboarded new clients and customized the system to satisfy their needs

### Business Analyst

Allianz Worldwide Partners

Paris, France

April 2013 – July 2016

#### **Responsibility: Implement a global IT transformation project within AWP group**

- Acted as an intermediary between business stakeholders and technical providers to roll out the Allianz Business System in over 10 countries globally
- Analyzed the business processes across business units, drafted the harmonization proposals to achieve efficiency and assisted in process implementation
- Prepared test scenarios, planned and conducted unit testing and supported User Acceptance Testing (UAT)

### Assistant Project Management Officer

BNP Paribas

Paris, France

April 2012 – October 2012

#### **Responsibility: Dashboard reporting on IT project management**

- Designed an Excel based project monitoring tool with resource, project timeline and budget data
- Managed project databases and supported monthly closing process

### Business Support Analyst

Schlumberger

Paris, France

May 2010 – January 2012

#### **Responsibility: Dashboard reporting on post-acquisition integration progress**

- Designed a SharePoint-based dashboard to monitor integration progress in different business units
- Collected, consolidated and analyzed KPI data from 30 markets around the globe
